

Claim 3 (Original): The aerosol preparation according to claim 1, characterized in that the paint material has an average molecular weight of from 2500 to 4500.

Claim 4 (Previously Presented): An aerosol preparation for two-component paint spray cans, comprising:

paint material comprising at least one MS (medium solid) acrylic resin containing OH-groups, said acrylic resin having an OH-number of between 130 and 140;

a hardener consisting of an aliphatic polyisocyanate, said paint material and hardener being filled in two different containers within a spray can and combined only immediately before their application, and

a propellant comprising a propane/butane mixture for spraying said paint material and hardener from the spray can.

wherein the weight ratio of paint material and hardener to propellant is 75:25 to 70:30.

Claims 5-7 (Canceled).
